DI

61. The system of Claim 58 wherein the beam is configured for sliding movement along the furniture, and the extension is configured for rolling movement along the floor.

62. The system of Claim 61 wherein the beam is movable on a track system.

63. The system of Claim 62 wherein the track system shown includes a horizontal rail mounted on the furniture.

64. The system of Claim 63 wherein the beam includes a mounting assembly having a slide mechanism engaging the horizontal rail.

65. The system of Claim 61 wherein the extension includes a floor wheel assembly.

66. The system of Claim 65 wherein the floor wheel assembly includes a caster.

67. The system of Claim 57 wherein the beam and the extension are formed of an "L"-shaped frame.

68. The system of Claim 57 further including a retractable partition that is adapted to define a private space when in a withdrawn position.

69. The system of Claim 57 wherein the extension is positioned at a lateral distance outboard of the furniture

B1

(70) A floor supported system for distributing utilities away from furniture elements carrying the utilities, comprising:

- a utility delivery zone;
- an overhead utility beam moveably attached proximate one end to the furniture configured to supply utilities to the utility delivery zone so that users may gain access to utilities routed through the furniture at a point away from the furniture; and
- a light fixture mounted on the beam.

SBD 71. The system of Claim 70 wherein the extension includes a canopy associated with the light fixtures.

72. The system of Claim 70 further comprising a utility infeed to allow utilities to be supplied to the utility delivery zone.

ALLOW

73. The system of Claim 72 wherein the utility infeed is a flexible conduit within a recess in the top of the furniture.

(74) A wall supported system for distributing utilities away from furniture elements carrying the utilities, comprising:
